

# External Capillary & Gauge Service Equipment

## SERVICE EQUIPMENT

BlueFin provides customers with reliable, dependable, and cost-effective systems including the latest designs in capillary and gauge services equipment, in conjunction with quality components.

Coupled with BlueFin's qualified personnel, we install chemical injection and reservoir monitoring systems at optimal depths, thus ensuring production management integrity.

BlueFin has all the components needed: injection valves, exit manifolds, gauges, wellhead outlets, surface acquisition units, anti-siphon valves, check valves, and filter assemblies, both 5k and 10k rated.

## SPOOLING TRAILERS

- Both single and dual spool trailers
- Air compressors
- Multiple hydraulic systems to run separate systems simultaneously
- Certified sheave wheels
- Hydraulic fluid used is biodegradable (Ecoterra 68)
- Large fuel capacity for extended work periods in the field
- Capable of utilizing a range of capillary tubing sizes
- Run speed of up to 250 ft per minute
- Line counters to ensure setting depths
- Chemical fluid pump for fluid injection and/or circulation
- Onboard injection tanks
- External fluid supply connection allows customer fluids to be pumped into well
- Complete installation tool kits
