

# Controlled Industrial Bolting

Expertise in Controlled Bolting Allows Measurement & Monitoring Vital for Joint Integrity

## SOLUTIONS

- Controlled Bolting
- Hot & Online Bolting
- Flange Management
- Nut Splitting & Stud Removal
- Tensioning

## ADVANTAGES

- Decreased Emissions
- Production System Efficiency
- Proactive Joint Integrity

Joint integrity is a vital need for oil and gas operations.

BlueFin's expertise in controlled bolting allows measurement and monitoring of parameters such as bolting relaxation, gasket creep, direct load loss and reduction of friction variables.

BlueFin applies this skill set to every job, understanding that each purchase order demands various bolting needs—from single flange installations, hot bolting maintenance, shut-in or turn-around programs, to EPIC projects and commissioning needs.
