- Chemical Injection Systems

EQUIPMENT

- DNV Spooling Units
- DNV Sheaves & Spreader Plate Assemblies
- DNV Safety Spool Baskets
- DNV Filtration Units
- DNV Control Cabin
- Protector Installation Kits
- Hydraulic Pressure Units
- Data Acquisition Units

BlueFin's Multi-line Spooling Services (MLS) provides the mechanical solution between surface control systems and downhole completion equipment.

This completion service consists of a variety of fit-for-purpose mechanical components that enable the proper installation of single line or multi-line flatpacks.

Our equipment fleet is built and maintained according to our company QMS program and industry standards. Combined with our years of field expertise and management leadership, BlueFin is a capable service provider for offshore operators.
