

Flow Assurance & Pipeline Cleaning

Solving Internal Pipeline Cleaning Challenges to Ensure Flow

SOLUTIONS

- Black Powder Removal
- Scale Removal
- Asphaltene Removal
- Paraffin Removal
- Online Cleaning
- Offline Cleaning
- Mechanical Dry Cleaning
- Internal Camera Inspection
- Pipeline Deposit Mapping

ADVANTAGES

- Engineering
- Electronic Monitoring
- Custom Chemistry Technology
- Procedural Execution

APPLICATIONS

- Offshore Pipelines
- Onshore Pipelines
- Overboard Water Lines

BlueFin's pipeline cleaning solutions deliver crucial benefits to current systems—upstream, midstream, and downstream.

Scale, black powder, asphaltenes, and paraffin wax are normal constraints facing operators and causing a multitude of integrity issues, starting with flow assurance restrictions, structural integrity concerns, ILLI determination, and product contamination, to name a few.

Through the use of custom chemistry, advanced diagnostics, mechanical techniques and field history, BlueFin has the operational depth to solve your internal pipeline cleaning challenge and ensure flow assurance.
