

Thru Tubing Control Systems

Injecting Chemicals and Well Monitoring at Precise Wellbore Depths

APPLICATIONS

- Paraffin/Wax
- Asphaltene
- Corrosion
- Scale
- Foaming
- Emulsions

PRODUCTS

- Control Line
- Chemical Injection Systems
- Well Monitoring Systems
- Surface Chemical Injection Packages

EQUIPMENT

- Capillary Units
- Injector Heads

Thru tubing control systems are designed for rigless operations and allow operators to inject chemicals and well monitoring at precise wellbore depths.

With BlueFin's capillary units, operators can deploy and retrieve capillary systems, thus increasing efficiency and reducing operating expenses.
